was made Tuesday last by Joseph Martin of New York, attorney for Russel Sage Raphael, in whose favor the judgment was entered. As a result Martin was before Judge Morse of the district court yesterday to show cause why he should not be punished for contempt.

Eighteen months ago Raphael began suit against the old Wasatch & Jordan Railway, now the Bingham branch of the Rio Grande, to recover on some bonds which his father held in the company. A judgment for \$2,000,000 was entered against the company by the federal district court in Utah. This was valueless, however, as the federal court could not order the sale of the railroad as that prerogative belongs to the state courts, the line being wholly within the state.

The Wasatch & Jordan property was acquired by the Rio Grande several years ago and is one of the most valuable branch lines in the world, tapping the heart of the great Bingham mining district.

On Sept. 23 last, Mr. Martin applied to Judge Morse for an order appointing Chester Martin, his son, as receiver under the judgment entered by the federal court in Judge Morse for an order appointing the beart of the great Bingham mining district.

Sign Placed in Station.

The case dragged from that time until a week ago when Mr. Martin and Judge C. W. Bartch applied to the supreme court for a writ of mandate to compel Judge Morse to change his decision. Failing in this, Mr. Martin on Tuesday last gave Stephen Colburn authority to take possession of the road and instructed him to place a sign in the station at Bingham Junction giving notice that a receiver had been appointed and that the road would be sold to satisfy the judgment on Feb. 29 by the receiver.

It was upon this that the charge of contempt was made by Assistant Claim Agent Howard of the Rio Grande Western, it being claimed that Martin's actions

ern, it being claimed that Martin's actions were in direct violation of the order of the court denying the request for the appoint-

clined to punish Mr. Martin, although he had intentionally violated the court's or-ders and told him that if he would stop the present proceedings he would dismis

the case.

This the attorney promised to do and the matter was dropped. Martin will take an appeal to the supreme court and make another attempt to secure an order of

sale.
The posting of the notice of sale caused considerable consternation in the offices of the railroad Thursday, when it was first brought to general attention and a number of large ore shippers demanded to know its meaning, asking if their con-tracts would be carried out the same as before.

Above is a complete record of the estimated value of the buildings authorized Wetzell. Following are the numbers; during the past year in Salt Lake, as ta"The Christmas Bells"Franz Abt ken from the books of D. W. Gamble, building inspector, together with the number of permits issued.
Although the number of permits issued

is smaller than last year, ...e value of the buildings erected under them exceeds last year by \$833,320. The number of permits given during 1906 was 625.

June was the biggest month. This is accounted for by the fact that the peraccounted for by the fact that the permits for the two Newhouse blocks, costing \$500,000 each, were taken out during that month. March is also large and this is in part accounted for by the taking out of the permit to build the Railroad Exchange building at Third South and Main streets, the estimated cost of which is \$100,000

A feature of the year has been the number of small homes which have been built. About 35 per cent of the permits issued have been for houses valued at between \$2,000 and \$4,000, and 20 per cent have been for homes which have been built for either more or less than these

There is every indication that the 1907 record will be broken during the coming year. Already plans are being made for a number of new structures, to cost all the way from \$50,000 to \$500,000, and in ad-
